ABOUT THE CITY STREET REHABILITATION PROGRAM

handles street resurfacing and significant curb repairs. This work includes grinding off old roadway surfaces, resurfacing the pavement with new asphalt, and repairing / replacing curbs where necessary. Residents may notice that the work is not continuous from start to finish on any given street, but it includes breaks for an extended period while the contractor performs work

on other roads. This is part of the scheduling to minimize costs. The job on a particular street is not complete until the pavement is fully replaced and smooth driving surface is restored. Every community in the City of Cincinnati will be targeted for roadwork on a three-year rotation under the Street Rehabilitation Program. Streets are selected based on pavement condition and available funding. The streets listed in this brochure are anticipated to be rehabilitated during the 2015 and 2016 construction seasons.

Once a contract is in place for a given set of streets, notices will be sent out to property owners within the affected limits identifying the schedule, the contractor, and the city representative coordinating the work.

This list is preliminary and is subject to change.

MAJOR ROUTES	street limits
